

EmobacTM Lotion

Benzalkonium Chloride 0.1%, Chlorhexidine Hydrochloride 0.1%,
Liquid Paraffin 2.5%, Isopropyl Myristate 2.5%

Composition

EmobacTM Lotion: Each gram Lotion contains Benzalkonium Chloride USP 1 mg, Chlorhexidine Hydrochloride BP 1 mg, Liquid Paraffin BP 25 mg, Isopropyl Myristate BP 25 mg.

Description

EmobacTM Lotion is a multiple combination lotion which exhibits antimicrobial and properties to control dry skin problem. Benzalkonium chloride and chlorhexidine dihydrochloride are antimicrobials. They help to combat bacteria present on the skin that can make eczema worse and prevent the infection caused by scratching itchy skin. Liquid paraffin and isopropyl myristate are emollients that help to soften, moisturize and protect the skin by trapping moisture in the skin and restoring the normal protective function of the skin.

Indications

EmobacTM Lotion is indicated in the treatment and prevention of dry and itchy (pruritic) skin conditions, especially eczema and dermatitis.

Dosage and Administration

Apply the lotion to the affected areas and rub gently into the skin.
Ideally, EmobacTM Lotion should be applied three or four times a day.
All age groups can use Emobac Lotion, including babies.
