

Eziflex

Montmorency Tart Cherry

Presentation

Eziflex Capsule: Each Capsule contains Montmorency Tart Cherry 500 mg.

Description

Eziflex (Montmorency Tart Cherry) contains Cyanidin 3-(2G-glucosylrutinoside) and Cyanidin 3 rutinoside. It inhibits formation of Monosodium Crystal in the joints by inhibiting Xanthine Oxidase. It also reduces the extraction of urate from the Kidney and lowers uric acid level. It suppresses Cox enzymes and inflammatory markers. Montmorency Tart Cherry also acts as Antioxidant as it has the ability to scavenge free radicals. It contains Melatonin that helps to maintain normal sleep cycle. It helps to maintain a healthy cholesterol level as well.
